

Anaesthesia Research 2019 2–3 December 2019

Venue: The Principal Hotel, York **Registration:** £175 for both days (£130 for registered anaesthetists in training) **Clinical Content Lead:** Dr Simon Howell, Leeds

Discover the latest research into the future of anaesthesia at Anaesthesia Research 2019. Over two days in December we will bring together the following groups under one roof to highlight the breakthroughs that will change what we know, and help you deliver new efficiencies in your practice:

- National Institute for Academic Anaesthesia (NIAA)
- Anaesthetic Research Society (ARS)
- Health Services Research Centre (HSRC)
- UK Perioperative Medicine Clinical Network Trials (POMCTN)

Anaesthesia Research 2019

Monday, 2 December 2019

09.00-09.25	Registration and refreshments	
09.25-09.30	Welcome and introduction	Dr Simon Howell, Leeds, and Professor Mike Grocott, Southampton
09.30-10.00	Determining the value of healthcare interventions	Professor Mark Sculpher, University of York Centre for Health Economics
HSRC sponsored	session:	
10.00-10.30	Beyond the numbers: The power of qualitative research	Dr Cecilia Vindrola, University College London
10.30-11.00	Can we measure improvement?	Richard Wilson, NHS England Improvement Analytics
11.00-11.15	Q&A panel	
11.15-11.45	Refreshments	
Joint session AR	S/POMCTN: Focus on research methodology	
11.45-12.00	Research and Audit Federation of Trainees national	Dr Caroline Thomas
	project 3: Drug Allergy Labels in Elective Surgical Patients (DALES): Innovative approaches to data collection and methodolgy	
12.00-12.15	Patients (DALES): Innovative approaches to data	Dr Louise Savic
12.00-12.15 12.15-12.30	Patients (DALES): Innovative approaches to data collection and methodolgy Drug Allergy Labels in Elective Surgical Patients (DALES): What do patients and their anaesthetists think	Dr Louise Savic Dr Mark Edwards
	Patients (DALES): Innovative approaches to data collection and methodolgy Drug Allergy Labels in Elective Surgical Patients (DALES): What do patients and their anaesthetists think about penicillin allergy labels?	
12.15-12.30	Patients (DALES): Innovative approaches to data collection and methodolgyDrug Allergy Labels in Elective Surgical Patients (DALES): What do patients and their anaesthetists think about penicillin allergy labels?Consent in emergency surgery: Lessons from FLO-ELA Optimising recruitment in randomised controlled trials in perioperative medicine: Lessons from the Quintet	Dr Mark Edwards
12.15-12.30 12.30-12.45	Patients (DALES): Innovative approaches to data collection and methodolgyDrug Allergy Labels in Elective Surgical Patients (DALES): What do patients and their anaesthetists think about penicillin allergy labels?Consent in emergency surgery: Lessons from FLO-ELA Optimising recruitment in randomised controlled trials in perioperative medicine: Lessons from the Quintet Recruitment Intervention in TOPIC2	Dr Mark Edwards Dr Caroline Wilson

Page 2 of 5

Joint session ARS/POMCTN				
14.00-14.15	POMCTN adopted trials: Update on recruitment	Dr Joyce Yeung		
14.15-14.30	Restrictive vs liberal transfusion strategy in patients undergoing surgery for fractured neck of femur: A feasibility study	Dr Mike Gillies		
14.30-14.45	POMCTN led trials: Update on progress	Professor Rupert Pearse		
14.45-15.00	Volatile vs total intravenous anaesthesia for major non- cardiac surgery: A randomised controlled trial (VITAL)	Dr Ben Shelley		
15.00-15.15	Do in vitro pharmacological challenge responses differ between muscle specimens from malignant hyperthermia probands and their susceptible relatives?	Dr Jamie Clarke		
15.15-15.30	TRPC3/6 channels appear to mediate the enhanced extracellular cationic influx in human malignant hyperthermia	Dr Vikas Kaura		
15.30-16.00	Refreshments			
Joint session ARS/POMCTN				
16.00-16.15	Sex influences cardiac dysfunction in early polymicrobial sepsis, independent of leucocyte-derived TNFa	Dr Sophie Walker		
16.15-16.30	Personalised genomic medicine to guide labour analgesia (EPIFEVER-2)	Dr Gareth Ackland		
16.30-16.45	Functional nociception receptors (NOP) are upregulated	A du A disula Dinal		
	on human umbilical vein endothelial cells during experimental in vitro sepsis	Mr Mark Bird		
16.45-17.00	on human umbilical vein endothelial cells during	Dr Despoina Giakomidi		
16.45-17.00 17.00-17.40	on human umbilical vein endothelial cells during experimental in vitro sepsis Characterisation of Dermorphinatto at recombinant			
	on human umbilical vein endothelial cells during experimental in vitro sepsis Characterisation of Dermorphinatto at recombinant MOP receptors	Dr Despoina Giakomidi Professor Rory O'Connor, Leeds		

Dinner must be booked in advance. Please contact <u>events@rcoa.ac.uk</u> for more information.

Programme subject to change.

Anaesthesia Research 2019

Tuesday, 3 December 2019

08.30-09.00Surgical trials: Proving our mettleProfessor Deborah Stocken, Leeds Clinical Trials Unit09.00-10.30NIAA Research Award sessionPreoperative sub-clinical heart failure: A potential target for prevention of perioperative myocardial injury?Dr Tom Abbott, Queen Mary University of LondonImproving tracheostmy care: An evidence-based approachDr Brendan McGrath, Wythenshawe Hospital, ManchesterMesenchymal stromal cell therapy reduces liver injury in pre-clinical models of post-transplant liver diseaseDr Andrew Owen, University of BirminghamPerioperative blood volume and haemoglobin mass measurementDr James Plumb, University of Southampton10.30-11.00RefreshmentsPoint session AKS/POMCTNDr Daniel Donnelly11.30-11.15Sugammadex to prevent post-operative pulmonary complications: A practice surveyDr Amour Patel11.30-11.45Elevated heart rate after non-cardiac surgery: Post-hoc analysis of a prospective observational cohort studyDr Gareth Ackland11.45-12.00RCT selective heart rate reduction to reduce myocardial injury/morbidity after non-cardiac surgeryDr Gareth Ackland12.15-12.30Learning curves of novice anaesthetists using needle tip tracking during simulated uttrasound-guided sciatic regional nerve block on the soft-embalmed Theil cadaverDr Amy Sadler			
Leeds Clinical Trids Unit OP.00-10.30 NIAA Research Award session Preoperative sub-clinical heart failure: A potential target for prevention of perioperative myo-cardial injury? Dr Tom Abbott, Queen Mary University of London Improving tracheostomy care: An evidence-based approach Dr Brendan McGrath, Wythenshawe Hospital, Manchester Mesenchymal stromal cell therapy reduces liver injury in pre-clinical models of post-transplant liver disease Dr Andrew Owen, University of Birmingham Perioperative blood volume and haemoglobin mass measurement Dr James Plumb, University of Southampton 10.30-11.00 Refreshments Improving tracheostomy corperative pulmonary complications: A proposed RCT Dr Daniel Donnelly 11.00-11.15 Sugammadex vs neostigmine for prevention of postoperative pulmonary complications: A proposed RCT Dr Amour Patel 11.30-11.45 Elevated heart rate after non-cardiac surgery: Post-hoc analysis of a prospective observational cohort study Dr Gareth Ackland 11.45-12.00 RCT selective heart rate reduction to reduce myocardial injury/morbidity after non-cardiac surgery Mr Hugh Paterson 12.15-12.30 Learning curves of novice anaesthelists using needle fitp tracking during simulated ultrasound-guided sciatic regional nerve block on the soft-embalmed Theil Dr Amy Sadler	08.00-08.30	Registration and refreshments	
Preoperative sub-clinical heart failure: A potential target for prevention of perioperative myocardial injury?Dr Tom Abbott, Queen Mary University of LondonImproving tracheostomy care: An evidence-based approachDr Brendan McGrath, Wythenshawe Hospital, ManchesterMesenchymal stromal cell therapy reduces liver injury in pre-clinical models of post-transplant liver diseaseDr Andrew Owen, University of BirminghamPerioperative blood volume and haemoglobin mass measurementDr James Plumb, University of Southampton10.30-11.00RefreshmentsJoint session ARS/POMCTN11.00-11.15Sugammadex to prevent post-operative pulmonary complications: A practice surveyDr Daniel Donnelly11.15-11.30Sugammadex to prevent post-operative pulmonary complications: A practice surveyDr Jamour Patel11.30-11.45Elevated heart rate after non-cardiac surgery: Post-hoc analysis of a prospective observational cohort studyDr Gareth Ackland11.45-12.00RCT selective heart rate reduction to reduce myocardial injury/morbidity after non-cardiac surgeryMr Hugh Paterson12.00-12.15A placebo-controlled randomized trial of intravenous lidocaine in accelerating gastrointestinal recovery after colorectal surgery (ALLEGRO)Dr Amy Sadler12.15-12.30Learning curves of novice anaesthetists using needle tip tracking during simulated ultrasound-guided sciatic regional nerve block on the soft-embalmed Theil cadoverDr Amy Sadler	08.30-09.00	Surgical trials: Proving our mettle

Joint session ARS/POMCTN				
13.30-13.45	Randomised placebo-controlled trial of continuous sciatic or posterior tibial nerve blockade on pain after major lower limb amputation	Professor Jonathan Thompson		
13.45-14.00	TBC	Dr Ben Shelley		
14.00-14.15	Very important outcomes in leg amputation: Programme grant (VIOLA)	Mr Rob Hinchcliffe		
14.15-14.30	Experimental medicine in anaesthesia-related research: UK and US activity	Dr Amour Patel		
14.30-15.00	Refreshments			
15.00-15.30	Experimental medicine: Advancing science and advancing care	Dr Charlotte Summers, School of Clinical Medicine, University of Cambridge		
15.30-16.00	From the bench to the patient	Professor Hilary Bekker, Professor of Medical Decision Making, University of Leeds		
16.00-16.10	Q&A panel			
16.10-16.30	NIAA awards and ARS medals			
16.30	Close of event			

Programme subject to change.
