5 CPD Credits

On Monday 13 January 2020, the College is hosting an all-day event for Perioperative Local Leads. Perioperative Leads are committed to the development of perioperative care and are working to assist in local delivery.

The event will look at the future of perioperative care and highlight key areas of development in terms of pathways and processes. It will also provide an excellent opportunity for networking. This event has been designed by the Centre for Perioperative Care Fellow, Dr Anne-Marie Bougeard. This event is initially only open to Perioperative Local Leads.

**Please note:** This programme is under development. CPOC reserves the right to change the programme/speakers as required.
