

2021 Anaesthetic curriculum webinar

25 March 2021

Venue: Zoom

As the new curriculum approaches, we are keen to get as much information to the anaesthetic community as we can.

What we often refer to as assessment covers a much greater breadth of activity than situations that require some form of categorical judgement; realistically, it encompasses the evidence that demonstrates learning, reflection, and progress. An understanding of 'assessment' activities is absolutely key for all anaesthetists involved in training, as it is the interface and practical realisation of the curriculum.

There have been some changes to both our philosophy regarding 'assessment' and how this has become manifest in the forms and procedures anaesthetists will be expected to do to evidence development.

2021 Anaesthetic curriculum webinar
