

**How do you feel about all this?**

Royal College of Anaesthetists

# What do you want us to take away from today?

Unbundle the issues, have a revolutionary and an evolutionary deal oven ready

Increased member engagement to provide a better understanding of college roles and responsibilities.

Positive engagement

Continue with plans - quickly

I like the idea of working together to make the college better

Might I ask who represents the views of associate members ? And probably a bit more specific IMGs who work as Anaesthetist / clinical fellows but are not in training nor are they SAS. Thank you.

Trustees who are anaesthetists must come from Council

Animation on how the college governance works

keep up the good work

Spend time listening to members

Agree with the plan of dividing the trustee from council.

Need representation from all areas related to college including undergraduate anaesthetic training

Good to see an engagement across the board; governing bodies should anaesthetic majority

More trustees not from council

The College is doing great work and listening to members. Keep up the good work. Spread the word via departments and specialist societies.

clear and open communication from the College

cohesion of the specialty

so complicated - you need to explain the charity aspect

Great discussion. Good to understand more about how the College works.

Representation from AAs

Trustees should bring expertise not representation

Need to unpick trustees from council members

board of trustees should not be a majority from council
