South London 2021 Trainee		0000000	

Key Capabilities

EPA 2: Provide general anaesthesia for an ASA I/II patient having uncomplicated surgery

Key Capabilities

EP_02_01

Pre-operative preparation

Relates knowledge underpinning EPA 1 (Anaesthetic Pre-operative Assessment) to safe perioperative care planning

Understands the scope of practice as an inexperienced practitioner and seeks help appropriately

Recalls starvation policies for administration of general anaesthesia

Demonstrates working knowledge of commonly used anaesthetic equipment, including the anaesthetic machine, standard monitoring and airway equipment

Demonstrates working knowledge of the commonly used anaesthetic drugs (preparation / dose / effects / side-effects / cautions):

Induction agents

Antiemetics

Muscle relaxants/reversal agents
Sympathomimetics/anticholinergics
Volatile anaesthetic agents
Analgesics

Show details

EP_02_02

Intra-operative Care

Performs airway management including the following techniques:

Mask ventilation
Supraglottic airway insertion
Endotracheal intubation using direct and video laryngoscopy

Performs a Rapid Sequence Induction

Conducts anaesthesia with controlled and spontaneous ventilation

Understands the physiological effects of general anaesthesia

Manages the risks posed to patients when positioning them for surgery, in particular related to pressure areas, peripheral nerves and other delicate structures

Follows infection prevention and control procedures in the operating theatre

Manages tracheal extubation, including common complications occurring during emergence from anaesthesia; eg, laryngeal spasm

Show details

EP_02_03

Post-operative Care

Gives a clear patient handover to recovery team

Manages issues arising in recovery including acute postoperative pain, and the use of rescue opiates in recovery

Show details

Date

20 September 2021

Description of Activity

- Anaesthesia for laparoscopic cholecystectomy in 45 year old female
- Treated HTN, BMI 26, ASA 2
- GA, ETT, Sevo/O2/Air, IPPV

Summary of reflective discussion between anaesthetist in training and trainer

- Managed the case with indirect supervision - supervisor in the coffee room, checking in after induction and available throughout for support
- Planned and discussed technique including multi-modal analgesic strategy
- Was able to manage the case without any senior input and patient was awake and comfortable in recovery

Supervision level

2b - Supervisor within hospital for queries, able to provide prompt direction/assistance

Suggestions for future development

- You are now practicing at the level expected for award of your IAC

- Continue to build on your experience working with indirect supervision in all appropriate cases as you build up your confidence
