

ACCREDITATION STANDARDS 2023

Summary of major changes to the ACSA Standards document for Domain 5 - cardiothoracic

This document summarises the major changes in the 2023 ACSA cardiothoracic standards following extensive consultation and review.

1. New ACSA standards

There are no new ACSA cardiothoracic standards for 2023.

2. Deletions of ACSA standards

None of the ACSA cardiothoracic standards in the 2022 iteration have been deleted for 2023.

3. Priority changes

There have been no changes to priorities in the ACSA 2023 cardiothoracic standards.

4. Additions/amendments

There have been no significant changes in wording or clarification added to existing ACSA cardiothoracic standards. However, please note that the previous cardiothoracic GPAS chapter has now been split into separate cardiac and thoracic chapters. Therefore the GPAS references against the standards have changed numbering.

5.4.3.3
