

# Practical Procedures grid

Practical procedures with suggested level of supervision

		Stage 1	Stage 2	Stage 3
<b>Airway management</b>	Insertion of supraglottic airway	3	3	4
	Intubation using standard laryngoscope	3	3	4
	Intubation using video laryngoscope	2a	3	4
	Fibreoptic intubation	1	2a	3
	Intubation in the awake patient	1	2a	3
	Emergency front of neck access (simulation)	2a	3	4
	Insertion of double lumen tube	1	2a	3
<b>CVS</b>	Central venous line insertion	2b	3	4
	Venous access line for renal replacement therapy	2b	3	4
	Arterial line	2b	3	4
	Ultrasound guided peripheral venous cannulation	2b	3	4
<b>Respiratory</b>	Needle thoracocentesis	2b	3	4
	Chest drain insertion	2a	3	4
<b>Regional Techniques</b>	Lumbar epidural	3	3	4
	Low thoracic epidural	1	2b	3
	Spinal anaesthesia	3	3	4
	Combined spinal/epidural	2b	3	4
	Simple peripheral nerve block	2b	3	4
	Ultrasound guided chest wall plane block	2a	3	4
	Ultrasound guided abdominal wall plane block	2a	3	4
	Ultrasound guided lower limb block including femoral nerve block and fascia iliaca block	2a	3	4
Ultrasound guided upper limb block including brachial plexus block	2a	3	4
